Tips for Avoiding the Academic Summer Slide

As summer vacation approaches, kids are gearing up for the season with little regard for the academics they will leave behind when the backpacks are hung up for the year. On the other hand, parents and teachers often worry about the loss of important skills throughout the summer months, which must be retaught once school rings in again. For parents intent on avoiding the academic summer slide, there are a number of ways to keep kids' brains in the game, even as they are looking forward to their break from the classroom.

Keep Them Reading

Studies have shown that kids can lose up to 25 percent of their reading skills over the summer months, which can have a significant impact on their ability to get back into the school swing in the fall. Here are some ideas to incorporate reading into the regular summer routine:

- Find something to read every day. Encourage kids to read the newspaper, online resources, books, magazines. . . . Any reading is good reading!
- Find things your kids want to read. Ask the librarian at your local library for recommendations based on your child's age, reading level or interests.
- Read aloud. Read together with your child!

Hang on to Math Facts

Math is another subject that tends to get lost in the summer shuffle. There are many options for students who want to retain their math skills over the summer months.

- Encourage students to take math or science-related jobs that will help them refine their academic abilities while learning important job skills.
- Find ways to add math to daily activities, such as calculating the volume of water in the city pool. Let teens get in on the trip-planning action, by setting a budget, calculating fuel needs, or figuring the distance between destinations.

"Summer learning should not be separate from summer fun," Holly Larson, a math subject matter specialist from Texas Instruments stated on the website. "Activities can be enjoyable while still adding educational value to a teenager's summer." Set aside time to work on academic skills every day. Give your family one-half hour every day to read, work math problems, or indulge in fun activities like puzzles. If the whole family gets involved, the children will be more likely to be eager to participate.
